SULIGE SRAVAN

AZURE DATA ENGINEER | PYSPARK, PYTHON & SQL | AZURE DATA FACTORY | SYNAPSE

Hyderabad, Telangana, India | +91 6303880961 | sravansulige@gmail.com| linkedin.com/in/SravanSulige | github.com/ssravan18

PROFESSIONAL SUMMARY

Azure Data Engineer with 2+ years of experience designing and optimizing scalable data pipelines and cloud data solutions using Azure Data Factory, Databricks, PySpark, SQL, and Delta Lake. Experienced in Medallion Architecture, data transformation, data modelling, and pipeline optimization, with a proven track record of improving processing performance and delivering reliable, analytics-ready datasets for reporting and downstream applications.

CORE SKILLS

• SQL • Python • Apache Spark (PySpark) • ETL/ELT Pipeline Development • Azure Data Factory • Data Warehousing (Azure Synapse) • Azure Fabric • Databricks • Unity Catalog • medallion architecture • Data Extraction & Transformation • Data modelling • Git

PROFESSIONAL EXPERIENCE

Tech Mahindra — Azure Data Engineer **Nov 2024 – Present**

- Supported end-to-end data pipelines across enterprise B2B systems, identifying data inconsistencies across multiple ETL pipelines and ensuring accurate source-to-target data processing.
- Optimized scalable ETL workflows for data migration, performance tuning, and data warehouse integration with robust cleansing, validation, and reliable data loading.
- Designed and optimized parameterized, reusable ELT pipelines, leveraging complex transformations to implement business logic while collaborating with analysts and architects to deliver efficient, scalable ETL solutions.
- Investigated data quality and integrity issues across multiple data sources, performed root-cause analysis, and implemented fixes to improve data accuracy and lineage.

PROJECTS

E-Commerce Analytics Pipeline with Databricks and Medallion Architecture

Tech Stack: *Azure Databricks, PySpark, Spark SQL, Delta Lake, Unity Catalog, ADLS Gen2*

- **Designed and implemented** an end-to-end e-commerce data pipeline using Bronze–Silver–Gold medallion architecture, processing 100GB of data**.**
- **Engineered ingestion workflows** from raw CSV/JSON sources into **ADLS Gen2**, using **Delta Lake** for ACID transactions, schema enforcement, and time travel for reproducibility.
- **Developed PySpark transformations** to clean, deduplicate, and conformed dimension and fact tables (customers, products, orders), applying broadcast joins and partitioning to minimize shuffles.
- Implemented **Unity Catalog** for centralized data governance, catalog/schema/table organization, role-based access control, and controlled access to analytical datasets.
- **Optimized Spark workloads** through cluster configuration, strategic caching, and partition tuning, targeting a **25% reduction in processing** time and **15–20% lower compute costs.**
- Created Gold-layer **analytics-ready datasets** and validated data quality through completeness, uniqueness, and consistency checks, targeting 97%+ data quality across critical fields.

End-to-End Azure Data Pipeline — On-Prem to ADLS Gen2

Tech Stack: *Azure Data Factory, Azure Synapse Analytics, PySpark, SQL, ADLS Gen2, Delta Lake, Parquet*

- **Designed and implemented** an end-to-end **ETL/ELT pipeline** using **Azure Data Factory** to migrate 200GB of on-premises data into ADLS Gen2, supporting scalable cloud data integration.
- **Developed data cleansing**, **transformation**, **validation**, and **reconciliation** workflows using ADF Mapping Data Flows, PySpark, and Synapse SQL to deliver analytics-ready datasets.
- Configured **parameterized and reusable ADF pipelines** with scheduled triggers, dependency management, retry policies, and error handling to improve pipeline reliability and maintainability.
- **Monitored pipeline** execution and data quality, targeting **25% faster processing**, 99%+ successful pipeline runs, and reduced unnecessary data movement through workflow optimization.

EDUCATION

Bachelor's (B.Tech.) in Information Technology **2020 – 2024**

Anurag University — CGPA: 8.45

CERTIFICATIONS

- Microsoft Certified: Fabric Data Engineer Associate — **DP-700**
- Microsoft Certified: Azure Data Fundamentals — **DP-900**
- Microsoft Certified: Azure Fundamentals — **AZ-900**
- GitHub Foundations — **GH-300**
- Java Programming (NPTEL) • Claude Code V1 L1
